Statistics: Number of Herds: **4**, Progeny Analysed: **81**, Scan Progeny: **22**,

Zorro was purchased privately in 2006 after inspecting bulls throughout Victoria, South Australia and Western Australia. He has predominantly been used on heifers and has proved to be a very easy calving sire of progeny that grow and develop well with excellent temperaments. The weight gains of his progeny has seen his Breeplan data improve and he is now a multi growth trait leader. He is a versatile bull backed by very sound Breedplan data. Semen is very limited.

Semen \$55 per straw
