Traits Observed: BWT, 200WT, 400WT, 600WT, SS, FAT, EMA, IMF

Statistics: Number of Herds: **11**, Progeny Analysed: **101**, Scan Progeny: **30**, Number of Dtrs: **9**

Small quantities of Y47 semen have been used in the herd for several years. We viewed Y47 in 2005 and found him to be a large, structurally correct sire that possessed an impressive side profile. He is a sound son of Starbright S117, who is combining growth and a large EMA with the ability to lay down fat easily. His calves have been very small at birth and for this reason we have been using him as our AI sire over heifers.
