

Wallawong purchases heart of Springwell

We were excited to recently acquire the pick of the Springwell Murray Grey herd. 20 mature age females with calves at foot and rejoined to growth trait leading sire, Gnoleda Zac, were selected. The cows are large with exceptional spring of rib, depth, and width through the hindquarter. Joined to Starbright bloodlines they will offer our clients industry relevant, top quality genetics. The majority of the females are either by, or by a son of, Springwell Trump Card, the well regarded sire whose progeny have sold for up to \$10,000.

Included in the group are two maternal half sisters, Emerald Z18 and Emerald Y82, (pictured below) as well as their dam Emerald U62. We believe that this family line will prove to be one of the best introductions into our herd in recent years.

Emerald Z18

Emerald Y82

Also included in the purchase was Fi Fi U12, the 2002 Brisbane Royal Senior Murray Grey Female and sire of several Springwell stud sires.

Another female to watch will be the large high capacity cow Requiem Y97. Other female lines purchased include Copper, Annora, Birdie, Greymist, Pine, Daiya, Banana and Sixpence.
