Traits Observed: BWT, 200WT(x2), 400WT(x2), SS, FAT, EMA, IMF

Purchased privately in 2009. We inspected Crown Prince as a young calf and again at 14mths. We feel that he is one of the most dynamic young sires that we have seen for several years. We would rank him in the same league as Sensational and Stratosphere as yearlings.

Actual Data

Age	Weight	Frame Score	Scrotal Size	EMA
14.5 mths	652kg	7+	42cm	104cm ²
21 mths	900kg	7+		128cm ²

Not only does he possess the right mix of excellent physical performance, his EBVs also rank highly. We are very confident with the quality of Crown Prince's dam line and sire. We have viewed his dam and granddam on farm and believe that his mother, Wiltshire Symphony Rose X12, is an elite cow that we would rank as one of the top ten Murray Grey females we have seen. This female strength is also evident with his granddam exhibiting excellent structure and performance. Crown Prince's sire, Murfield Apache, is a dynamic, athletic sire, who weighs in at 1162kg with an EMA of 148cm². We have seen him on a couple of occasions, the first being when he was awarded the Supreme Interbreed exhibit at the 2007 Hobart Royal. He has great sire appeal and has passed this on to Crown Prince. Highly recommended for those breeders wanting elite new genetics, the selection work is already done for you.

Semen \$80 per straw
