Nobleman was purchased by us in 1991, his Breedplan figures were exceptional for his generation. He was the original stud sire and proved to be very reliable and efficient. He sired 62 calves in the registered herd and more than 100 in the commercial herd. He is a very good bull for joining to heifers, producing below average birthweight calves that are born easily. We would highly recommend him for use as an AI sire over heifers especially those looking for ease of management. Semen is limited.

Semen \$22 per straw
