Calf Sire Verification

All Black Angus calves have been sire verified as details shown in the catalogue. All Silver and Grey calves have been sire verified as details shown in the catalogue, with the following exceptions. Calf on Lot 107 – verification pending as calf age has prevented verification by sale date. Calves noted in catalogue by AI sires Garangi Mr Mannum and Kelso Cracker as yet have not been verified as the submitted sample did not meet laboratory specifications. These calves have been tested against any likely alternatives and none have been found. Once a sufficient sample of Mr Mannum/Cracker are submitted all calves should verify. Lot numbers involved include 114, 117, 140, 141.

Genetic Testing

Please note that the most up to date genetic test/sire verification for each lot can be accessed via the Angus Australia database. Of note are the recent tests, Lot 88, LEJ22S151 has tested as a DD carrier. Dam of Lots 6 and 10 and embryos Lots 103 and 104, ESTE44, has tested free of AM, DD, NH and CA.
